

Truss mounts

for flat panels

The Audipack truss mounts for flat panels are,

the most perfect and solid solution to mount flat panels to truss constructions.

Audipack®

It's great to have solutions...

Installing flat panels **safe** and **quick** to a **Truss**

Flat panels can't be easier mounted to a truss than with one of the Audipack truss mounting solutions.

Audipack offers a program of flexible and safe products. Speed and safety are key elements at Audipack when flat panels are being installed to trusses. With a minimum use of tools, external materials and risks the panels can be installed.

A fixed mount is available which is directly mounted to the truss. There is also a product line with several lengths of tubes, for a more flexible way of installing flat panels.

To install your flat panel to an Audipack product an additional flat panel bracket is needed.

See chapter "Mounting brackets for flat panels" Page 41 for an overview of the available brackets.

- ▲ **Telescopic models available**
- ▲ **Easy and safe installation**
- ▲ **Suitable for Ø 50 mm truss**
- ▲ **Free adjustable angle**

Stainless steel security cable: **399941**

DIRECT TRUSS MOUNT

2 X

Ref.	390694	Max. °	Max. 80	
Dimensions in mm excl. clamps	W 450 x D 30 x H 450	55		
Suitable for truss width in mm	250 - 300			
Truss diameter in mm	50			
Ref.	392560	Max. °	Max. 80	
Dimensions in mm excl. clamps	W 530 x D 30 x H 450	65		
Suitable for truss width in mm	300 - 400			
Truss diameter in mm	50			

TRUSS TUBE SETS

Ref.	FTC-1500T	Max. °	Max. 60	
Length in mm	909-1500	65		
Truss diameter in mm	50			
Tilt adjustment in degrees	0-20°			
Rotation in degrees	360°
