

Since the development of flat panels Audipack has been one of the first and most innovative manufacturers of flat panel accessories. With the development of the 500 series flat panel floor stand Audipack has added a functional accessory to the programme that in the meantime has become famous all over the world. The design of the flat panel stand perfectly fits in with the design of the flat panel and has various temporary or permanent set-up options, such as:

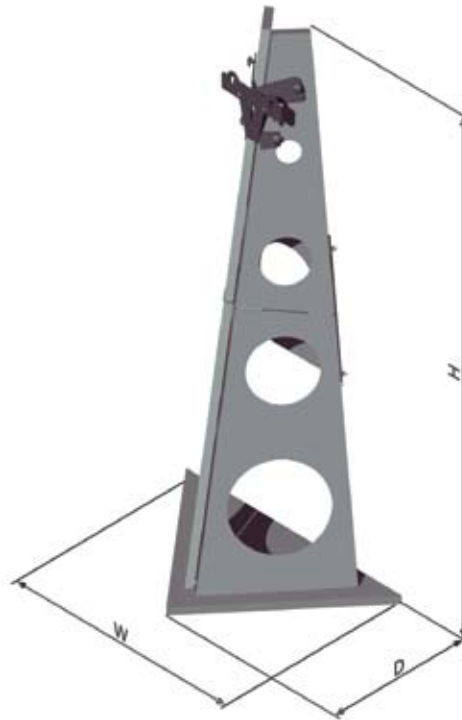

- ▲ At fairs or on-site presentations
- ▲ A set-up in the scenery in television studios
- ▲ In showrooms and reception areas
- ▲ For Point-of-Sale applications

Of course no tools are needed for setting up the flat panel stand, as the concept is made of lightweight aluminium and consist of only four components. The floor stand guarantees a safe and solid set-up of all available flat panels up to a diagonal of 50 inch and is universally exchangeable when using a custom Audipack flat panel bracket or a universal Audipack Uniflatfix Pro flat panel bracket. The floor stand is equipped with the Lock&Secure mounting system.

The pyramid design floor stands are foldable and fit in a standard or custom built Audipack flightcase together with a flat panel to make the perfect rental set.

Foldable floor stand L&S 3
